FISHING SOCIETY UPDATE

The Haliburton Forest Fishing Society continues with its fish stocking program with 4500 fish being stocked this fall. Through the generosity of all those who have contributed this year the Fishing Society proves itself to be a fine example of landowner/stakeholder collaboration for a common goal based on stewardship of the natural world. Contributions are still required to meet our goal this year which can be made through the Main Office or online through the Haliburton Forest website. We have had some reports of memorable catches being made on our stocked and non-stocked lakes. We are so lucky to have a both great trout and bass fishing within our property on beautiful remote and undeveloped lakes, unbelievable for central Ontario. The fishing experience at Haliburton Forest has really come on in the last 7 years since the inception of the Haliburton Forest Fishing Society. Let's work together to help it to keep improving for the years to come.

Please note: Haliburton Forest values consistent and professional communication with its community.
